Authorized to work in the US for any employer

### WORK EXPERIENCE

#### Software Engineer / Programmer

Payroll Service Solutions - Philadelphia, PA - January 2016 to Present

Assist with the administration, development and management of the Organizations Web Portal. The Web Portal serves as a central location whereby customers can enter information and statistics pertaining to their account. The Web Portal is continuously updated and redesigned using Classic asp.net, C++, HTML, CSS, and Java Script.

- Providing technical support to the organizations Customer Service Department. This Department utilizes an in-house, customized desktop application which allows the Representatives to manage our client accounts with respect to obtaining current information and updating the statistics. Our Representatives also utilize this application to create new clients as well as provide client access to the Customer Web Portal. This customized application was developed using MFC, Visual C++, C++, and Btrieve database (transactional), and is systematically improved.

- Involved with the report generation of specific customer numerical figures. These reports are created using an in-house customized application. This application uses C++ to determine proper placement of data before the processing phase begins.

#### Web Developer / Computer Programmer

Burlington Coat Factory - Edgewater Park, NJ - October 2015 to December 2015

Responsible for the development and management of the intercompany Intranet. Member of the Web Development team which administered the Intranet. Tasked with page layout, hyperlink strategies, the incorporation of streaming video via Java Script, management of information updates, and overall Quality-of-Service / Quality Control testing.
