## Electrical Engineer

Ambler, PA - Email me on Indeed: [indeed.com/r/Thomas-Piacentino/afb5b6d5a006bef8](https://www.indeed.com/r/Thomas-Piacentino/afb5b6d5a006bef8)

### WORK EXPERIENCE

#### Electrical Engineer

Lincoln Drive West - Ambler, PA - August 2015

Dear Stafford Bandlow Engineering,

I learned of your posting for an Electrical Engineer through Indeed job search. I am very interested in the field of Electrical Power and Systems Engineering and would greatly appreciate consideration for such a position. I am currently employed in the field of Compliance Engineering but am actively seeking a change of paths into the field of Power and Systems Engineering.

I strongly feel my current position as a Product Compliance Specialist demonstrates many of my natural abilities. I have been able to excel in this position becoming a crucial part of the Compliance team despite an unfortunate lack of genuine interest. This position has to improve my time management and productivity abilities. It has also provided me with valuable experience interacting with Electrical/Mechanical/Software Engineers, Business groups, and customers simultaneously. Further details of my position at ARRIS can be seen in my résumé.

Sincerely,

### EDUCATION

#### teaching

Stanford

#### management, and planning skills

University of Delaware
