Installation Technician

Philadelphia, PA - Email me on Indeed: [indeed.com/r/Rodney-Rhoe/d5c838b2a350d3bf](https://www.indeed.com/r/Rodney-Rhoe/d5c838b2a350d3bf)

Seeking a career that will utilize and advance my knowledge and skills. The ideal position would be an entry to junior level position with an organization that will allow me to grow from within and advance to greater responsibilities.

Authorized to work in the US for any employer

WORK EXPERIENCE

Installation Technician

Navigation Solutions - Philadelphia, PA - December 2012 to October 2013

Installed GPS's and mobile electronics in a wide range of rental vehicles for Hertz. Used basic hand, extensive soldering and power tools to complete the task, vehicle wiring knowledge was essential and care in maintaining the vehicle was priority. The use of wiring harnesses, connectors and the installation of antenna's along with basic computer knowledge aided with the completion of the assignment.

Technician

First Mobile Technologies - Conshohocken, PA - April 2010 to March 2011

Installed GPS's, antenna's, power supplies, modem's, computer mounts and power packs in a wide range of vehicles from passenger to utility. Used a vast array of connectors and components, hand and power tools, wires and loom for each install.

Operator/Trainer

Micron Technology, Manassas - April 2006 to June 2007

Worked in the semi-conductor industry where I began as an SMT operator and within six months earned a position as a trainer. As a trainer I was responsible for new hire training as well as keeping present employees updated on new procedures and ECN's. Tools used were computer operated and our job was to test wafers prior to shipping.

Installation Tech

Mastec/Direct TV - Chantilly, VA - October 2005 to March 2006

Contracted to install and upgrade satellite systems by selecting dish locations, installing wiring, programming the system and giving customers a brief description of services.

Shipping Clerk- Procacci Bros

Selector - February 2000 to May 2005

Phila., Pa

Responsible for filling orders in produce warehouse for various supermarket chains. Loaded trucks for shipping using forklifts and pallet jacks and assisted in inventory management.

Building Supervisor

Dresden Management - April 1999 to October 1999

Phila., Pa.

Served as a maintenance supervisor overseeing four apartment complexes and managing a small crew of workers. Additional duties included light carpentry, plumbing, HVAC and electrical.

Engineer

Datamat Systems Research - Warminster, PA - November 1996 to April 1999

Served with a team of engineers developing a proof of concept military flight simulator and trainer for a fully interactive, 4-axis controlled, 40 foot diameter, transportable human centrifuge.

Responsible for maintaining, upgrading and modifying computers and computer controlled systems, motors, motor control systems,

video and video controlled systems, digital and analog electronics,

480 volt, 240 volt and 120 volt power supplies, safety systems and instrumentation. Additional duties included troubleshooting and

repairing electronics down to component level using o-scopes and voltmeters to repair circuit boards, extensive soldering(surface

mount, thru-hole and fine pitch) using guns and irons, designing and fabricating cables and operation of centrifuge during demonstrations, test and evaluations.

Maintenance Worker

Metric Realty - San Francisco, CA - May 1992 to November 1996

Contracted to maintain apartment complex to include cleaning, lighting, general carpentry, electrical repair, painting and plumbing.

Armor Crewman

U.S. Army - August 1988 to April 1991

Operated and maintained tank mounted electronics, lasers and their interface with tank operators to include working with milling machines, drill presses and the like to repair mounts and housings for electronics.

EDUCATION

Electronics

Lyons Technical Institute

1986 to 1988
