WORK EXPERIENCE

Clinical Pharmacist

Pennsylvania Hospital (UPHS) - Philadelphia, PA - March 2015 to Present

- Collaborating with physicians and nurses to modify and individualize drug therapies to facilitate safe, effective and economical patient care
- Reviewing medication orders and dispensing medications after assuring that drug, dose, and route of administration are appropriate
- Reviewing patient allergies and lab data, as well as detecting and preventing drug-drug and drug-disease interactions prior to dispensing medications
- Recommending alternative medications, dosage forms and routes of administration when necessary
- Deleting therapeutic duplications and preventing unnecessary extended therapy
- Communicating with physicians and nurses to clarify orders that are unclear or incomplete
- Recommending formulary substitutions for non-formulary drug orders
- Compounding parenteral dosage forms utilizing aseptic technique
- Providing medication counseling services to patients being discharged from the emergency department
- Interviewing patients about their home medications and contacting outpatient pharmacies to assist physicians with medication reconciliation
- Attending codes in the emergency department to assist with preparing medications, as well as to serve as a drug information resource to physicians and nurses
- Directing pharmacy technicians and interns
- Using Pyxis software to monitor and manage medications on hospital floors, as well as to manage controlled substances

Staff Pharmacist

St. Joseph's Hospital - Philadelphia, PA - December 2011 to July 2015

- Reviewing medication orders and dispensing medications after assuring that drug, dose, and route of administration are appropriate
- Reviewing patient allergies, as well as detecting and preventing drug-drug interactions
- Communicating with physicians and nurses to clarify orders that are unclear or incomplete
- Providing drug information to healthcare personnel
- Using Connect-Rx software to monitor and manage medications on hospital floors
- Using McKesson NarcStation for management of controlled substances

Staff Pharmacist

Pottstown Memorial Medical Center - Pottstown, PA - September 2012 to March 2015

- Collaborating with physicians and nurses to modify and individualize drug therapies to facilitate safe, effective and economical patient care
- Reviewing medication orders and dispensing medications after assuring that drug, dose, and route of administration are appropriate
- Reviewing patient allergies, as well as detecting and preventing drug-drug and drug-disease interactions prior to dispensing medications
- Recommending alternative medications, dosage forms and routes of administration when necessary
- Providing antibiotic pharmacokinetic dosing and monitoring services utilizing Sentri7 software
- Recommending formulary substitutions for non-formulary drug orders, as well as switching to formulary alternatives when approved by Pharmacy and Therapeutics Committee
- Serving as a drug information resource to nursing staff and physicians
- Compounding parenteral dosage forms utilizing aseptic technique
- Directing pharmacy technicians and interns

Pharmacy Manager

Rite Aid Pharmacy - Philadelphia, PA - August 2008 to September 2012

- Preparing approximately 300 prescriptions per day for treatment of various disease states
- Managing up to three pharmacy technicians at a time and overseeing two pharmacy interns
- Communicating with physicians on assessing patients' drug allergies, drug interactions, dosing schedules, cost effective treatments and prior authorization issues
- Contacting prescription drug insurance plans for information on patients' benefits eligibility and alternative medications
- Counseling patients on compliance, adverse effects, proper use of medications, blood pressure monitors, blood glucose meters, and MDIs

Clerkship Experience

Clinical Inpatient

Temple University Hospital, Philadelphia, PA Preceptor: Christina Ruggia-Check

- Attended rounds with a medical team consisting of an attending physician, two medicine residents and two medical school students
- Served as a drug information resource for the medical team
- Recommended alternative medications and dosage forms when necessary
- Informed patients about their medications: common side effects, monitoring the effectiveness, when to seek medical attention, and emphasized the importance of compliance
- Presented patient-specific cases to preceptor

Institutional

Holy Redeemer Hospital, Meadowbrook, PA Preceptor: Maira Jardak

- Provided drug information to healthcare personnel
- Assisted pharmacists in converting patients from IV to oral therapy when necessary
- Screened patient medication profiles for drug interactions
- Made recommendations on enoxaparin dosing based on indications and patients' renal function
- Helped to prepare parenterally administered dosage forms utilizing aseptic technique
- Presented to pharmacy staff on various methods of calculating creatinine clearance and advantages and disadvantages of each

Industry
