## WORK EXPERIENCE

### **Chemical Operator II**

Johnson & Johnson - Wilmington, DE - February 2013 to Present

#### Responsibilities

Control or operate chemical processes or systems of machines, using panelboards, control boards, or semi-automatic equipment.

- Monitor recording instruments, flowmeters, panel lights, and other indicators, and listen for warning signals, in order to verify conformity of process conditions.
- Move control settings to make necessary adjustments on equipment units affecting speeds of chemical reactions, quality, and yields.
- Record operating data such as process conditions, test results, and instrument readings.
- Start pumps to wash and rinse reactor vessels, to exhaust gases and vapors, to regulate the flow of steam, air, and to add products to converter or blending vessels.
- Draw samples of products, and conduct quality control tests in order to monitor processing, and to ensure that standards are met.
- Turn valves to regulate flow of products or byproducts through agitator tanks, storage drums, or neutralizer tanks.
- Inspect operating units such as towers, storage tanks, scrubbers, collectors, and driers to ensure that all are functioning, and to maintain maximum efficiency.
- Confer with technical and supervisory personnel to report or resolve conditions affecting safety, efficiency, and product quality.
- Interpret chemical reactions visible through sight glasses, and review laboratory test reports for process adjustments.
- Regulate or shut down equipment during emergency situations, as directed by supervisory personnel.
- Calculate material requirements or yields according to formulas.
- Notify maintenance, engineers, and other auxiliary personnel to correct equipment malfunctions and to adjust power, steam, water, or air supplies.
- Patrol work areas to ensure that solutions in tanks and troughs are not in danger of overflowing.
- Direct workers engaged in operating machinery that regulates the flow of materials and products.
