ADDITIONAL INFORMATION

Self-motivated pharmacist, possessing strong work ethic, proficiency in managing staff and work flow, and outstanding commitment to delivering quality patient care.

Pharmaceutical Expertise: As Lead Pharmacist with Millennium Pharmacy Systems, provided quality patient care and customer service to a broad spectrum of patients in the long term care practice setting. Served over 12,000 beds from the current pharmacy location by professionally dispensing and advising on prescription medications, IV drugs, narcotics, over-the-counter and herbal medications.

Managerial skills:

- Trained pharmacist on their role in checking, dispensing and usage of pharmacy software
- Help properly train technicians on their positions of preparing IVs, IV pump management, compounding suppositories/syringes/solutions/topical mixtures, narc preparations, STAT resolutions, clinical decisions, bingo card packing, running auto-med unit dose packaging, E-box and med-dispense management
- Managed pharmacist schedule
- Worked with local hospitals to acquire any needed meds not stocked in the pharmacy
- Worked along with IT to build new compounds on software and resolve computer software and hardware issues

Clinical skills:

- Managed proper Tikosyn, Thalomid, Clozaril, Vaccine, Total Parenteral Nutrition dispensing
- Provided drug information to nurses and physicians to recommend changes in therapies when needed
- Compounded suppositories, gel syringes
- Prepared IVs
