### WORK EXPERIENCE

#### Project Engineer

DIXON ENVIRONMENTAL - 2011 to 2013

Primary responsibility was to provide air, water and hazardous waste technical compliance project support for various projects including: refineries, chemical plants, seed manufactures, pharmaceutical and data centers companies.

- Conducted detailed technical analysis for compliance and permitting projects
- Performed Emission calculations
- Processed Title V semi-annual reports and Title V deviation reports
- Generated Air permits, such as Title V renewal application, ATC, PTO
- Conducted environmental compliance reporting, such as EPCRA SARA 311, 312, 313
- Researched and selected relevant project information for out of state clients
- Helped maintain up-to-date information on company's website
- Researched and helped write and review technical reports including the production of accompanying spreadsheets; Authored summary reports based on fieldwork results performed by third party
- Increased project managers effectiveness by reviewing publications and other information resources for material relevant to specific projects

#### Environmental Scientist

URS Corporation - 2011 to 2011

Primary responsibility was providing technical support, analyses, and document production and preparation. Experience in regulatory activities include air, water and hazardous waste, but are not limited to:

- Air permit applications, Title V application
- Review of LDAR compliance reporting
- Preparation and analysis of GHG inventories
- Environmental compliance reporting, such as EPCRA SARA 311, 312, 313 for Marcellus drilling companies
- SPCC plan
- Assisted with SWPPP
- Hazardous/Residual waste reports and TIER II reports
- Environmental compliance audits

#### Environmental Scientist

DIXON ENVIRONMENTAL - 2007 to 2009

Primary responsibility was project management analysis that was used for compliance to local, state and federal regulations. These analyses included, but are not limited to:

- Preparation and analysis of Greenhouse Gas inventories
- Oil spill prevention control and countermeasures (SPCC) plan preparation
- Hazardous/Residual waste reports
- Maximum achievable control technology (MACT) compliance and applicability evaluations
- Energy reporting
- Auditing of Leak detection and repair (LDAR) compliance reporting

- Assist in the development and production of project materials such as reports, power point and other visual presentations, including assistance in design, writing, editing, and reproduction
