Pharmacist seeking to utilize knowledge, professional skills, and experience in providing accurate drug and medical information to patients and healthcare professionals using extraordinary interpersonal skills with the goal of building strong patient therapeutic alliances. Highly motivated to use my experience to further expand the education and well being of patients within an environment that promotes teamwork and success.  
Authorized to work in the US for any employer

## WORK EXPERIENCE

### Staff Pharmacist

King Kullen Pharmacy, Patchogue - Bethpage, NY - June 2009 to May 2015

Counsel patients in proper drug administration, maintaining medication compliance and to notify Health Provider and/or Pharmacist for any potential patient endorsed side effects.

- \* Consult physicians and other healthcare professionals pertaining to particular drug's efficacy, potential side effects, dosage, and appropriate therapy
- \* Verification, identification of potential drug-drug interactions, dispense, and compound medications
- \* Maintain regular inventory of controlled and non-controlled substances.
- \* Blood pressure screenings

\* Provided MTM pharmacy services

1. Through programs such as Mirixa and Outcomes, was able to provide medication therapy management (MTM) to patients and consult with their physicians for drug and disease management.
2. Reviewed medications, their proper usage, side effect profiles, adherence, and constructed care plans crafted to each patient's individual needs.
3. Worked alongside physicians to build a strong therapeutic alliance and address all patient concerns in the management of their healthcare.

\* Immunization Administration

1. Providing routine immunizations to patients with both flu and shingles vaccine.
2. Educating patients on the importance of routine vaccination compliance along with prevention in high risk patients with comorbid conditions.

\* Creator and Founder of Diabetes Club

1. Aims to both educate and support diabetic patients and their families.
2. Patients were provided with monthly pamphlets including information on prevention, disease management, healthy recipes, and drug savings/coupons for patients in need of financial assistance.
3. Patients also received drug information on diabetic medications with an emphasis of outlining steps for the treatment and prevention of acute diabetic emergencies.

### Pharmacist - Entry Level

Walgreens Pharmacy - Hempstead, NY - February 2009 to June 2009

Counsel patients in proper drug administration and identifying medications side effects.

- \* Provide patient education, support and resolve insurance obstacles.
- \* Consult physicians and other healthcare professionals regarding drug efficacy, potential side effects, dosage, and appropriate therapy.
- \* Verification, identify potential drug-drug interactions, dispense, and compound medications

\* Maintain regular inventory of controlled and non-controlled substances
