### WORK EXPERIENCE

#### Integrated Pharmacist

CITYLIFE NEIGHBORHOOD CLINICS - Philadelphia, PA - August 2015 to Present

Conduct comprehensive appraisals of patients' health status by taking health and drug histories

- Document relevant findings of a patient's health status in the patient's medical record.
- Evaluate drug therapy through direct member care involvement with clinical assessment, subjective, and objective findings related to patients' responses to drug therapy and communicates and documents the findings and recommendations to the team.
- Develop, document, and execute therapeutic plans utilizing the most effective, least toxic, and most economic medication treatments as per National Pharmacy and Therapeutics Committee or PBM-specific guidelines or protocols including the Preferred Drug Formulary.
- Order and analyze laboratory and diagnostic test data so as to modify drug therapy and dosing as necessary.
- Implement medications, including initiation, continuation, discontinuation, and altering therapy based upon established formulary or protocols.
- Provide ongoing primary care for chronic, stable, or minor acute health problems, as delineated in protocols and procedures and assists in the management of medical emergencies, adverse drug reactions, and acute and chronic disease states.
- Provide member and health care professional education and medication education.
- Evaluate and document patients' and caregivers' ability to understand medication instructions and provide oral and written counseling on their medications.
- Identify and takes specific corrective action for drug-induced problems.
- Serve as a clinical manager of drug-related programs and subject-matter expert in conjunction with care team responsibilities.

Outpatient warfarin management
