To enter professional, career-oriented setting in which my eighteen years of work experience and technical skills in pharmaceutical industry in china will be fully utilized in U.S.A.

WORK EXPERIENCE

Senior Engineer and Licensed Pharmacist

Jiangxi Pharmaceutical Co., Ltd - August 2005 to August 2006

- Nanchang, Jiangxi Province, China

Senior Engineer and Licensed Pharmacist (worked in General Manager Office, Full-time)

September 2006 - June 2010

Managed successfully corporate confidential archives and sensitive information, and filed and retrieved corporate documents, records and reports, and positively interacted with all levels of employees and departments in the company.

Opened, sorted, and distributed incoming English correspondence including faxes and e-mails, and translated it into Chinese for the corporation.

Supported the R&D department with translating technical documents such as insert-sheet, specification which required for both corporate custom and new product launches into English.

Presented English posters or scientific presentations on new product in international conferences such as CPHI China Exhibition at Shanghai once a year from 2007 to 2009 and The World Exhibition in 2010.

Senior Engineer

Research & Development Department - October 1996 to August 2006

Worked closely with project teams to perform pilot and testing lab work by using routine analytical method.

Assisted with other scientists searching and identifying USPTO, EPO of patents related to corporate product line to attain relevant competitive information and translated the English patents such as preparation of microbial fermentation of antibiotics patent into Chinese, enable in-house research lead to better new product design.

Assisted with the preparation and filing of patent applications for the supported new product.

Assisted with project teams translating the quality standards of products which collected in USP (U.S. Pharmacopoeia), EP (European Pharmacopoeia), BP (British Pharmacopoeia) into Chinese, improved in-house standards of the same products and attained better technical parameter and performance.

Engineer and Technician (worked in antibiotic production workshop laboratory)

July 1992 - September 1996

Used sterile technique, sampling, preparation of agar plates and broth to detect antibiotic producing strains at various stages of fermentation medium growth conditions, check whether there was contamination of the fermentation broth and periodic testing cleanliness of sterile production environment and personal hygiene of production operators in sterile antibiotic powder production section through sterile technique.

Analysis of antibiotic intermediates which produced in the fermentation process of API (active pharmaceutical ingredient) as per SOP and pharmacopoeia of PRC, using biochemistry method.
