WORK EXPERIENCE

Clinical Pharmacist

Enclara Pharmacia - June 2013 to Present

Consult with hospice nurses and physicians regarding end of life symptom management, including acute and chronic symptoms, including malignant nausea, pain, complex neuropathies and behavioral disturbances associated with dementia

- Enable hospice clients to implement cost control measures by adhering to their hospice specific formulary and help transition from non-formulary medications to formulary alternatives
- Contribute in development of symptom management guidelines for hospice clients for patients experiencing symptoms related to end stage liver disease, urinary tract infection, lower respiratory tract infections, herpes zoster, bacterial conjunctivitis, skin and soft tissue infections and singulitis
- Discuss formulary and end of life symptom control with visiting palliative care physicians

Project associate

Adelphi research - July 2012 to Present

Developed and helped assist in implementation of both qualitative and quantitative studies

- Gained experience in questionnaire design, development of a discussion guide, fieldwork, etc.
- Helped project teams with drug information, clinical and medication reimbursement issues to ensure accurate language and design of surveys and discussion guides
- Interviewed physicians to understand their prescribing behavior and thought process behind choice of certain drug regimens

Pharmacist, CVS

CVS Health - July 2011 to Present

Ensure safe and effective use of medications by patients

- Communicate with other healthcare professionals and ensured appropriate use of medications by patients
- Consult patients on medication use and adverse events
- Provide immunizations to adult patients
- Improve patient medication adherence by communicating the benefits and managing expectations of chronic medications

Pharmacotherapy lab instructor

Philadelphia College of Pharmacy - January 2012 to May 2012

Evaluated students on patient and clinical skills, such as BP monitoring, glucose monitoring, etc.

- Present students with scenarios where pharmacotherapy knowledge application was required
- Help students develop critical thinking and decision making skills needed in community pharmacy setting for medication review and patient counseling
